RELEVANT EXPERIENCE

TORRE DASH
BACKEND DEVELOPER | 2020

Torre Dash is a web and console application where some processes that the torre.co company performed manually were automated, saving time when managing its users and job opportunities.

Developed in Python, Flask, React, MySQL.

AIRBNB REPLICA
BACKEND DEVELOPER | 2020

Replica of AirBnB (command interpreter, website, database and API).

Developed in Python, Flask, Jinja, MySQL, JavaScript.

EDUCATIONAL PROFILE

HOLBERTON SCHOOL
FULLSTACK DEVELOPER | NOV 2020

- Holberton is a project-guided, peer-learning-based software academy that brought me knowledge in low- and high-level programming, databases, network security, and much more!

SENA (NATIONAL LEARNING SERVICE)
SYSTEM TECHNIQUE | BATCH 2018

- Lective and practical stage that trained me as a systems technician, focusing mainly on network management, maintenance of computer equipment, and customer service and support.
